

Pine Point Tree Service

Website Summary | FITFO Systems
March 2026

FIT[F]O Systems

What's Done

Your website is built and ready for review.

- Shows your equipment, services, and real work
- Includes the birch takedown video
- Features three verified customer reviews
- Maps your 15-mile service area with Massachusetts context
- Mobile call button always visible — one tap

Estimate Tool

- Homeowner picks a service, answers targeted questions for that service
- Gets an instant price range (low / typical / high)
- Two next steps: **Schedule a Follow-Up** or **Call Now**
- Custom carving has its own request form with photo upload
- Pricing is proof of concept — needs checking against your real numbers

What We Need From You

- Are the three reviews accurate and approved?
- Can we get a photo of you for the About section?
- How long have you been in business?
- Should Jason's number go on the site?
- Do you want custom carving featured?

- Do the estimate ranges feel right against recent jobs?
 - Do you handle emergency storm calls?
 - Any towns to add or remove from the service area?
-

Feedback

We've set up a short form to keep things organized:

Feedback Form: <http://previews.fitfosystems.com/feedback.html>

Takes a few minutes. Covers each section of the site with specific prompts so we can make revisions efficiently.

Next Steps

Preview link: <http://previews.fitfosystems.com>

- **Review the site** — desktop and mobile
 - **Try the estimate tool** — pick a service, go through the questions
 - **Send feedback** — use the form link above
 - **We finalize and deploy** to your GoDaddy hosting
-
