

# Pine Point Tree Service

Website Project Overview | Prepared by FITFO Systems  
March 2026

---

## What This Is

A website built to establish trust quickly, show your work clearly, and make it easy for homeowners to take the next step.

The site is built, styled, and ready for your review.

---

## How the Site Is Structured

The layout follows the order a homeowner thinks through when deciding who to call.

---

## Opening — Your Equipment

- First impression: your truck, chipper, and equipment on a real job site
- Communicates immediately that you show up prepared with real gear
- Works well for now

**Future improvement:** An action shot from a job — someone working in a tree, a trunk coming down — would create a stronger first impression.

---

## Services

- Tree removal, trimming, stump grinding, lot clearing
- Each service explains the scope clearly so homeowners can tell if their situation fits
- Descriptions are specific — mentions homes, power lines, driveways, 80-foot hardwoods

---

## Why Pine Point

- Owner on every job
- Fully insured
- Transparent pricing
- Full cleanup included
- Positioned before photos — trust comes before proof

**Needs your input:** An owner photo would strengthen this section. Homeowners hire people, not brands. We'd also like to add how long you've been in business.

---

## Our Work

- Leads with the birch takedown video — precision work over a house, autoplay on desktop
- Before/after slider comparisons visitors can interact with
- Full lot clearing transformation timeline
- Custom stump carving spotlight

**Note on before/after photos:** Current photos are usable and show real work. Strongest results come from shooting the same spot, same angle — before and after. Easy habit that builds your best marketing asset over time.

## Reviews

Three verified customer reviews:

- **Susan B.** (Facebook) — oak grooming and brush trimming
- **Roger R.** (Facebook) — large maple near deck, pool, and fence
- **Isaac H.** (BBB) — three large trees, fair pricing, great communication

**Action required:** Confirm these quotes are accurate and approved before publishing.

---

## Service Area

- Clean map showing 15-mile radius from Leicester
  - Lists surrounding towns
  - Instantly tells visitors whether they're in your coverage area
- 

## Contact

- Phone, email, address, Facebook link
  - Sticky call button on mobile — always visible, one tap to call
- 

## The Estimate Tool

This is what sets Pine Point apart from other tree service websites in the area.

## How It Works

- Homeowner answers 5 questions (service type, tree count, height, access, hazards)
- Gets an instant price range — low, typical, high
- No phone call needed, no contact form required first
- Can optionally leave their info and upload photos of the job

## Photo Uploads

- Available on all estimate requests, not just carving
- Helps you understand the job before you call back
- Messaging: "helps us understand the job before we come out"

## Custom Stump Carving Path

- Separate form for creative work that can't be priced online
- Customer describes their idea and uploads stump photos
- You review and follow up

## Pricing — Proof of Concept

- Current numbers are based on general industry ranges, not your actual jobs
  - Before going live, we want to compare against your recent invoices
  - The system improves over time as real job data feeds back in
  - Low-variation work (stump grinding) converges fastest
- 

## What We Need From You

- **Reviews** — are the three quotes accurate and approved?
  - **Owner photo** — even a phone photo for the About section
  - **Years in business** — how long have you been operating?
  - **Jason's number** — should it be added?
  - **Custom carving** — confirm you want this featured
  - **Estimate check** — compare ranges against 3-5 recent jobs
  - **Emergency work** — do you handle storm calls? What response time?
  - **Service area** — is the town list complete?
- 

## What's Ready vs What Comes Later

### Ready Now

- Complete website with all sections
- Estimate tool with instant pricing
- Custom carving request form
- Photo upload on all forms
- Mobile-optimized with tap-to-call
- Service area map
- Real customer reviews

## Before Go-Live

- Form backend — submissions go to a Google Sheet you check on your phone, plus email notifications
- Image compression for faster loading
- HTTPS security on GoDaddy

## Future

- Google Business Profile setup
  - Automated review requests after completed jobs
  - Estimate accuracy improvement with real data
  - Seasonal promotion banners
  - Facebook/Instagram ads if needed
- 

## Next Steps

- Review the site preview
  - Tell us what works, what's off, what's missing
  - Send back the checklist
  - We finalize, wire forms, and deploy
-
